

Disposable Liner(Bin Liner, Tray Liner and Box Liner)

Disposable liners are widely used for hygiene, convenience, odor control, containment and protection in waste management systems.

Disposable liners make it easy to remove and transport waste without the need to directly touch or clean the bin, and they protect the inside of bins from scratches, stains and other damage, prolonging the lifespan of the bin and shortening the working time of cleaning staff, saving the costs.

Disposable liners help to trap unpleasant odors within the bag and prevent the goods from getting damaged during transportation.

Disposable liners in different colours are another way to classify different types of the waste or goods and help handle the goods effectively.

Features

- **Volume:** 10L-240L
- **Sizes:** Customised
- **Shapes:** Tie Handle/ Star Sealing/ C-folding/Flat Sealing in roll and in loose
- **Thickness:** from 7 mics
- **Scented options**

Materials

- **PE:** LDPE, LLDPE and HDPE (Recycled and Virgin)
- **Compostable Polymers**
- **Kraft Paper**
- **Kraft Paper with coated/Laminated PE or PLA**
- **Baking Paper**

Common Applications

- **Bins/Cans**
- **Trays**
- **Boxes**
- **Oven/Air Fryer**
- **Steamer**
